MUHAMMAD DARWISY BIN AZIZOR

Data Engineering & Analytics
Merlimau, Melaka, Malaysia | +60 19-447 8162
mdarwisyyy@gmail.com | Portfolio: darwisyyy.github.io
Available for full-time employment from January 2027

PROFESSIONAL SUMMARY

Data Analytics undergraduate with hands-on experience developing AI-powered applications, data workflows and browser automation tools at Pumpkin AI Ventures. Skilled in Python, SQL, Power BI, Tableau, FastAPI, React and TypeScript, with experience integrating LLM services, improving data reliability and generating analytical reports.

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript, TypeScript
Data Engineering & Databases: DuckDB, dbt, Google BigQuery, Firestore, ETL pipelines, dimensional modelling
Data Analysis & Visualisation: pandas, NumPy, Excel, Power BI, Tableau, Looker Studio, Plotly
Machine Learning: scikit-learn, data preprocessing, feature scaling, Support Vector Regression, cross-validation
AI Applications: Google ADK, LLM API integration, prompt design, structured outputs
Web Development: FastAPI, React, REST APIs
Automation & Testing: Playwright, Patchright, Pytest, Vitest
Development Tools: Git, GitHub, Linear

PROFESSIONAL EXPERIENCE

Data Engineering Intern
Pumpkin AI Ventures Sdn Bhd
January 2026 – Present | Expected completion: December 2026

Data Engineering Assistant — AI-Assisted Data Processing

- Developed a Python and FastAPI application using Google ADK agents to support natural-language data queries, cleaning, insights and visualisation.
- Implemented CSV and Excel ingestion into DuckDB, automated dbt staging models and generated star schemas with fact and dimension tables.
- Developed Google Sheets synchronisation and BigQuery integration, refining tool schemas, data validation and pipeline error handling.

GeoFlow — AI Visibility and Content Analysis

- Developed backend and frontend features using Python, FastAPI, React and TypeScript for AI visibility analysis, website audits and content workflows.
- Improved response collection, citation handling and scoring to distinguish usable evidence from incomplete answers and collection failures.
- Developed PDF, Excel and CSV reports with consistent filters, timestamps and source references; standardised Gemini and OpenRouter outputs for evidence-supported content generation.

Tracking Health Check — Website Tracking Audit Automation

- Built a reusable Python and Patchright tool to detect outgoing GA4, Google Ads, Meta and TikTok events across ecommerce and lead-generation journeys.
- Developed HTML reports with supporting browser evidence and improved automation for dynamic forms, cookie banners, cart interactions and checkout navigation.

EDUCATION

Universiti Malaysia Terengganu

Bachelor of Science (Data Analytics) with Honours

2023–2027 | Expected convocation: October 2027

CGPA: 3.64

Relevant Coursework: Database, Data Structures and Algorithms, Introduction to Machine Learning, Probability and Statistics for Data Analytics, Predictive Analysis and Data Visualisation.

ACADEMIC PROJECTS

Malaysia Affordability Dashboard

Python | pandas | Power BI | Excel — DataCrunch, UMT | 2025

- Prepared and integrated public socioeconomic data with pandas for comparisons across 16 Malaysian states and federal territories.
- Built a Power BI dashboard with state filters, geographic mapping and comparison charts; verified the exported index against the Python notebook.

Seahorse Environmental Data Analysis and Predictive Modelling

Python | pandas | scikit-learn | SVR | Plotly

- Analysed 100 seahorse observations to explore relationships between species, temperature, salinity and pH.
- Applied data preprocessing and feature scaling and compared 24 SVR hyperparameter configurations using three-fold cross-validation.
- Created visualisations of environmental relationships, model predictions and residuals to interpret results.

CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google, via Coursera | 2026
- Google Project Management Professional Certificate — Google, via Coursera | 2026

LEADERSHIP & ACHIEVEMENTS

Vice President II — Himpunan Mahasiswa Matematik, UMT | 2024–2025

- Coordinated club activities with committee members, supported event planning and promotion, and helped keep programmes on schedule.

Gold Medalist — International Education Innovation Competition

Universiti Pendidikan Sultan Idris | 2025

- Collaborated with a team to develop and present an educational innovation that received a Gold Medal.

Activity Committee Member — International MathAid+ Scholar (iMAC+)

Yogyakarta, Indonesia | 2024

- Helped coordinate an international programme and facilitated mathematics learning sessions for more than 200 students.
